

Seats

A sturdy surface to be seated is referred to as a seat. These Seats are usually raised above floor level and the majority of seats are supported by four legs and could carry a single individual. A stool is a seat that does not have a back or any arm rests. A seat that has folding action and an inclining footrest is known as a recliner, whereas a seat along with arms only is considered an arm seat. When a seat has connected wheels, it can be known as a wheelseat and if the seat is hung from above, it is called a swing. A permanently connected seat in a train or a theatre is referred to as a seat or airline seat, yet when riding; it is a saddle as in bicycle saddle. A car seat is the type utilized inside automobiles and an infant car seat would be a seat specifically intended for little kids.

The design of the seat can differ rather significantly to be able to accommodate several requirements and aesthetic tastes. As an instance, designs can be decorated with drilled openings, can comprise gaps or low backs for ventilation or be made of porous materials. The seat back can be designed as an included headrest by means of extending the height over the occupant's head. Seats may be made together with an attached, built in footrest or come with a separate matching ottoman. An ottoman is a short stool which is intended to be used as a movable footrest. At times the ottoman can be connected to a glider chair with swing arms, enabling the ottoman to rock back and forth together with the glider like a rocking chair with a built-in footrest.

Covers for seats are temporary fabric wraps providing protections against wear or to offer better aesthetics. Presently existing there are a large range of seat covers from leather to neoprene. More formal materials could be rented for events like for instance weddings in order to enhance the decor. Some seat covers have decorative seat ties or bows connected to be tied at the rear of the seat in a decorative know or ribbon. Several individuals make use of customized clear plastic furniture covers so as to protect their expensive sofas and seats.

Seat pads are cushions intended for seats, often decorative; they may even be used in motor vehicles so as to add to the drivers' height. Orthopaedic backrests give support for the back, usually in lower spine or lumbar area. Various makers have their seat pad designs patented and are recognized by some medical organizations. Some of the new car seats accessible are equipped together with built-in and adjustable lumbar supports to provide extra ease to passengers as well as drivers of the vehicle.
